

A Superior Brand of Detection

Our expertise and state-of-the-art technology provide the best inspection in the business. We follow it up with meaningful, easy-to-understand reports. You save time and money.

What is the Superior Detection Process?

- It begins with a wide range of expert knowledge about all types of commercial roofing.
- Thorough on roof evaluations are done including membrane and substrate analysis, core samples as needed and inspection of all penetrations and details.
- We take the extra steps necessary to identify current and potential issues, many roofing problems are not able to be detected by the naked eye.
- We employ non-invasive, thermal and nuclear technologies to see beneath your roof's surface.
- All customers receive comprehensive written inspection reports with digital photos included.
- We most often recommend a strategy to repair and maintain existing roofs that if followed extends roof life.
- We plan for your budgetary reality, always looking out for your bottom line-saving you money!

SuperiorScan's Thermal Inspection discovers insulation moisture problems.

These types of problems are most often undetectable by the naked eye.
